

English Knowledge Curriculum Conference

Leicester
Teaching
School
www.letslearn.org

How do we create a knowledge-rich curriculum in English?

How do we decide what is 'the best that has been thought and said' and then craft a curriculum so effective and compelling that no student is left behind? How do we ensure that all pupils benefit from their rich literary heritage and develop their own distinctive voice?

In one day, this purposeful conference will ensure you leave knowing the 'how to' of creating a knowledge-rich English curriculum. It will feature highly-effective English practitioners, leading sessions on

- ◆ a knowledge-rich curriculum and rationale
- ◆ how to create a Knowledge Book
- ◆ deconstructing English practice (vocab and essays)
- ◆ feedback
- ◆ a 'live' knowledge-rich lesson
- ◆ closing the net and vital interventions

There will also be a key note presentation on

'Curriculum is Progress' by Summer Turner

Summer Turner is a leading voice in the education community, speaking at conferences and debates such as The Telegraph Festival of Education, ResearchEd and WomenEd.

Her highly acclaimed book 'Secondary Curriculum and Assessment Design', published in 2016, won praise for its focus on developing curriculum and assessment, and features practical examples of how to develop leaders and teachers in this neglected area of school professional development.
