

Aggregating Marginal Gains through Action Research

OVERVIEW

"If you always do what you've always done, you'll always get what you've always got." (Henry Ford)

We are seeking to create a series of practitioner-led action research projects that support teachers in improving their work in mathematics education. In particular we want to assist children in reaching their potential through developing fluency, reasoning and problem solving skills.

These action research projects will produce CPD, teaching resources and activities that will form a bank of material which the educational community can draw upon and develop.

WHO IS THIS FOR?

This programme is open to all teachers in any phase of education. We would also welcome applications from multiple teachers from the same school.

WHAT IS INVOLVED?

Applicants should consider areas of research that they would like to work on, but these will be finalised and developed at the initial training day. After the first workshop participants will have developed clear research questions and an action plan for investigating.

Full training and support will be given on an on-going basis throughout the year. The key dates for attendance at The Minster School are:

Wednesday 28th November 2018, 9.30am to 12.30pm

Thursday 31st January 2019, 9.30am to 12.30pm

Wednesday 22nd May 2019, 9.30am to 12.30pm

Friday 21st June 2019 - Primary Conference

EXPECTATIONS OF PARTICIPANTS AND THEIR SETTINGS

- Participants will be expected to attend three Work Group days over the year
- Schools will be expected to release participating teachers for the three days set for the workshops and provide support to enable them to complete gap tasks at school in between workshops.
- Schools are expected to be open to evaluating their existing models and policies, and potentially making organisational and attitudinal changes.

FUNDING

The programme will be fully funded through the East Midlands East Maths Hub, however there will be a £15 per session fee for non-attendance to cover costs.
