

CPD Masterclass: Understanding and supporting attachment difficulties and complex trauma. How they can affect children and young people's development, including their communication skills.

A day for Speech and Language Therapists and other professionals working with children and young people who have both Social Emotional and Mental Health Needs (SEMH) and SLCN. The aim of the course is to develop practitioners understanding of how attachment and trauma can affect children's lives; their development, behaviour and their communication skills, as well as evidence based ways to support them.

Understanding how attachment works and what happens when it is compromised, is often important in understanding children's behaviour. Sadly many children and young people who have SEMH have also experienced complex trauma which can also affect their development and their ability to interact effectively. It is important to try to understand their experiences and be familiar with effective ways to support them.

Course Date	Friday 5 th June 2020, 9.30am to 4.30pm
Course Venue	The Royal College of Speech and Language Therapists, 2, White Hart Yard, London, SE1 1NX
